PROFILE

I'm a motivated Computer Engineering student with a keen interest in utilizing my knowledge in web and mobile app development, as well as DevOps. I am really interested in DevOps engineering and I need to continue my career in DevOps. My goal is to contribute my technical abilities and creative problem-solving to exciting projects, while also growing within a collaborative and progressive team environment. I am currently pursuing a B.Sc.Eng. in Computer Engineering at the University of Ruhuna, currently in my third year of undergraduate studies.

PROJECTS

Otto Car sale and Rental service (Group project , Academic)

Role: Project Manager & Front-end Developer

Developed a fully functional React.js web application for Otto car sale and rental services. Users can view available vehicles, request vehicles, sell their vehicles, and book vehicles for road trips. The car sale owner can manage everything using the admin dashboard. Managed client interactions and team workflows with Jira.

Technologies: React.js, Redux, Axios, Tailwind Css, Jira, Nodejs, Springboot, Git, Aws, Docker, Jenkins

Find Cameraman (Group project , Academic)

Role: UI Designer & Front-end Developer

Created a Flutter mobile app to connect users with cameramen for events with their specific requirements. Used Firebase to store all user and cameraman data, including event images.

Technologies: Flutter, Firebase

MediMate (Individual project)

Role: Developer

Developing a health management app with features like secure record storage and medication reminders.

Technologies: Reack.js, Nodejs, MongoDB, Tailwind Css

TECHNICAL SKILLS

- Java, JavaScript, C++, C
- Python, Shell Scripting
- AWS, Git, Terraform, Ansible, Jenkins, Docker, Kubernetes
- Github actions
- Linux Ubuntu
- HTML , CSS
- React, Redux
- Express
- NodeJS
- MySQL, MongoDB
- Flutter, Dart
- Agile Methodology

PlacePilot (Individual project)

Role: Developer

Built a web app using React.js to help users find nearby stores, utilizing web scraping with Puppeteer. The fully functional app allows users to download store details as a CSV file. This project was a self-study initiative on Puppeteer.

Technologies: React.js, Node.js, Puppeteer, HTML, CSS, JavaScript

Pipeline for a backend using Node.js (Individual project)

Role: Developer

Created an automated CI/CD pipeline for a Node.js backend using GitHub, Jenkins, and Docker.

Technologies: Node.js, GitHub, Jenkins, Docker, AWS

Ultimate CI/CD Pipeline (Individual project)

Role: Developer

Created an automated CI/CD pipeline to deploy a React application on an AWS EC2 instance.

Technologies: React.js, AWS EC2, Github Action, Docker, ArgoCD, Kubernetes

DevOps Project (Group project , Academic)

We are currently engaged in a group project focused on DevOps, which is part of our semester 6 curriculum. This project is ongoing and actively being developed by our team. In this project, we need to develop a CI/CD pipeline and automate procedures for the Otto Car Sale web project.

EXTRACURRICULAR ACTIVITIES

- Photographer of faculty media unit
  REF Media
- Member of Weightlifting team

SOFT SKILLS

- TeamWork
- Leadership
- Time Management
- Ability to adapt and fast learner
- Critical Thinking

ACHIEVEMENTS

HaXtream 2.0 - 2023
7th place for team 1st Lane

CTF 1.0 - 2024
5th place for team BitBusters

CERTIFICATES

DP Education - Web Development

HackerRank - Java

HackerRank - Problem Solving

EDUCATION

O/L & A/L - Govt : Science College Matale.

B.Sc.Hons. in Computer Engineering (UG) - Faculty of Engineering University of Ruhuna
[Current GPA : 2.97]
